

Quantum Bell Inc. 2017-2018

First Annual Report

Compiled by Michael Joseph Marley

QUANTUM

Quantum Bell Inc. 2019

Quantum Bell Inc. About our Company

Quantum Bell is established in Florida 2018 as a Corporation; and is established to engage any and all lawful business. The board of Directors for Quantum Bell, has 5 managing operating units. MarleyLABS.net, Theoryofrelativity.net, and Quantunnel.com, Onsea.net. Those participating persons are assigned by operating unit. Each operating unit contributes to the scientific data set enabling the technology of Quantum Bell. Quantum bell does not use the United States or other patent systems because we are not permitted to do so. If the state of country where we are operating must know how the hardware is used or functions, we can provide details. That protection for scientific pursuit is established with consistency in the public domain, and dated material as part of a scientific data set and proprietary information held by the company, and among other observation. That insurance for logical interest is built up with consistency in the general population, area, and dated material as a feature of a logical informational index and restrictive data held by the organization, and among other perception. Quantum Bell Inc. Leverages the research and development at quantunnel.com and while discovering the ToTLR models, for advantages in research and development. The company is small, and is registered in the State of Florida. Recent acquisitions include the right to earn from income producing properties derived at spiderhunter.org, use of trade tools, discovered methods, and research. The spiderhunter.org website will be maintained as a trade company for the association of field surveyors, and early work achieving a library of research and practice as taught to interested persons. With agreement, Quantum Bell.org is not a contractor or franchise of spiderhunter.org; and is listed as a second enterprise using similar survey methods of a trade association, where both companies use the same tool with a purpose.

This reports has multiple Addendums necessary for the scope of project acquisitions.

Annual Report Addendum 1a Acquisitions .

Annual Report Addendum 2a Acquisitions from Public Domain.

Quantum Bell Inc. Management

The management team of Quantum Bell inc is a complex management. Our executive must manage projects, contribute, and support as part of rotating or interest based structure that supports the over all work of one area of research or another. This work is not only correlated across research opportunities, and field experience or think tank and development activity, but also across other aspects of innovation like GAOL research, assignments, or discoveries, and then allocation in the public or private domain with some requirement to finish, find support for, or otherwise resolve our selves those issues.

Often there are no other people willing to do the research our company does, or with such a unique or innovative approach to working across industry segments I have established as part of the company.

Quantum Bell Inc. Field work

Field work at Quantum Bell Inc is complicated by assessments and meetings of OIO and other as described above in origin. This executive, and scientist of the company enjoys using the technology we develop. The field work and products or services of Quantum Bell Inc span five segments for data collection or evolution among products offered to the customer, and those are

- uLINE Services <http://www.quantumbell.net/services/uline.html>
- EMF Field Mapping <http://www.quantumbell.net/services/emf.html>
- Distributed Systems <http://www.quantumbell.net/services/dwst.html>
- Telecommunications <http://www.quantumbell.net/services/telecommunications.html>

On Demand Science http://www.quantumbell.net/services/on_demand_science.html

Demo Service and Projects is a special category for this website. The demonstrations here will be available for public evaluation, and purchase if the customer is interested in the product, service, or extended documentation sets. This page will be used to wet the palate, specifically for open source or distributed, and crowd sourcing answers for projects and problem models identified.

Categorical

- Hand Tool Demonstrations (Use, Mapping, and Anti-Weapons)
- Hand Tool, Rabbit Ear Type
- Hand Tool, Microwave Detection
- Hand Tool, AM and Radio Proximity Mapping
- Process Tool, Magnetic Field Mapping
- Energy Systems Demonstrations

- ToTLR Research and the ToTLR Universe Proofs and Demonstrations
- Flight Systems Concepts
- "Anti Gravity" Flight Research (Load Bearing)
- Navigation and Life Support Systems
- High Power Locomotion
- Solar, Planetary, and Local Star Group Processes
- Special Interest Developments (Proprietary)
- Technology of Man
- Second Heart Research
- Survive the Flesh with reproducible Process (Priority)
- Small amphibians and Insects is achievement level to date.
- Prototype and Out-process development
- Time Relative Research
- Ghosts and Paranormal Activity (People and Machine)

Two types of innovation are included on this page as demonstrations by the scientists. These demonstrations are needed to evaluate concepts of the American ToR model and Quantunnel Research aka Quantum Tunneling. The event is named as what I believe I witnessed in the evening sky. After research this has been more precisely described as a Bridge event or projection, and absent any indicator a mass can fly faster than the speed of light (no expected proofs needed.) Quantum Bell incorporated and Quantunnel, or currently researching the events in the sky, and to determine what can be expected at various stages of the bridge assembly event. If you would like to get involved, contact the laboratory.

Quantum Bell Inc. Public Research Offerings

Research opportunities at the company are periodically made available to the general public while seeking cooperation to achieve one GOAL or another. As part of QBI research, the following links are for phase beta offering, typical of the first innovative application of communications structures involving psychic, or paranormal communications efforts, some would consider atypical of human communications types. Other research by quantum bell inc is

within natural tolerances, including methods of communication that are among the highest bandwidth the universe offers withint a threshold of natural, as discovered by the lab for portion of RULE and Tor Research.

These projects like phase beta testing can be understood more by visiting http://www.quantumbell.net/service_beta_testing/index.html

Public and GOAL research cooperatives can be found here http://www.quantumbell.net/projects/quantum_bell_projects.html

Public and Volunteer research or business opportunities can be found here http://www.quantumbell.net/volunteer/quantum_bell_volunteer.html

Quantum Bell Inc. Operating Units

Because I work with so much information on daily basis, research, projects and other opportunities are allocated by division and opportunity across a portfolio of research. This link provided is for public presentation of description for operating units acting as "Chair" for one pursuit or another, and where these might later be modified, increased, or decreased, by public record.

You can learn more form the public description by visiting here.

http://www.quantumbell.net/operating_units/quantum_bell_operating_units.html

Annual Report OU Quantunnel

On February 14th, 2018, Quantunnel agreed to participat as an operating unit of Quantum Bell Inc. This project is a research agenda established after witnessing an event in the evening sky and then establishing a pursuit to understand it. The scientist on the project is not educated among the physics of modern educational systems to argue on behalf of other scientisits, and has applied a relevant approach after discovering the ToR and RULE. This work is used to determine the shape of the path, the transit details, to extract transit header data, and contribute to development projects as required while recovering or exploring technical use and other schema.

Quantunnel Inc. holds 1 piece of stock, as a set.

This is link you can use to visit the Quantunnel. Website

<http://www.quantunnel.com/>

This link, you can use to see me in the labors across two phases of the first initiatives, and where has taken over 8 years to build the early enterprise foundations.

<http://www.quantunnel.com/inthelab/index.html>

Achievements

1. The Snapshot index indicate the portable projects work that has been evaluated, and their is not security better than that of in my head or by typewriter. This research is protected by the laboratory and among officers of the law, who have completed some efforts at reduing access to technical data, or otherwise cooeprating with other nations to isolate an internet network used by our company and among other residents of this town for conflcit. This research has its first expected loitigation planned for the year 2019 regarding corpoate and governments espionage.

Annual Report OU Quantum Bell Inc.

Quantum Bell Inc. was established as reception facility. Across projector alignment of goals for one agreement or project think tank operation or another, projects are collected, analyzed and distributed. Where apportion are made public and portion are not. QBI is currently on a state isolated computer system, and is unable to file patents without our employees being hospitalized by men of the united states government or state governments, and expects to overcome this obstacle denying civil rights, liberties, or other access to standard court system of the state and federal government by agreement of us armed forces or other international contractors of the armed forces, their enemies, and more.

This is link you can use to visit the Quantum Bell Inc. Website <http://www.quantumbell.net>

This is link you can use to visit the Quantum Bell Inc. Corporate registration with the state of Florida <http://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?inquirytype=EntityName&directionType=Initial&searchNameOrder=QUANTUMBELL%20P180000131290&aggregateId=domp-p18000013129-846edb01-3354-497d-b4a1-1751d36c8ac9&searchTerm=quantum%20bell&listNameOrder=QUANTUMBELL%20P180000131290>

We have stabled three technician classes within the company across innovation indexes and field work, evolutions for contact, and other types or field work, and are working to establish the roles of one type of scientisit or another.

Our company has a valid EIN and FEIN as issued by the Internal Revenue Service, and has used the newspapers in town to indicate the use of name Quantum Bell Inc., by our executives, as part of requirement to use legal advertising to establish the name registered with the state of Florida department of corporations.

Those roles are

- technician.quantumbell.net
- technician.quantunnel.com
- technician.theoryofrelativity.net

High lighted in this section are the achievement of the organization, including developments of contributing groups, as part of a combined strategy to resolve the danger of cosmic events, earth sciences, and to respond to them.

Quantum Bell Inc. holds 1 piece of stock, as a set.

Achievements

1. Methods for communication with RULE tolerance have been achieved, these were handed to our division from Marley LABS, as a method to replace radio or long range communications types. The project was received with a capability to hide in interstellar space a signal or communication, across some distance, and contained bandwidth greater than modern technology.
2. The Snapshot index indicates the portable projects work that has been evaluated, and their is not security better than that of in my head or by typewriter.
3. Time projects are ongoing.

Annual Report OU onSEA

On February 14th, 2018, onSEA became an operating unit of Quantum Bell Inc. The reference to onSEA is for vessels considered navy in origin, where air force craft typically maintain and point to point crew or staff, onSEA vessel on oceans or SEAs, and in solar orbit, or often referred to as on SEA of one type or another.

onSEA holds 1 piece of stock, as a set.

This is link you can use to visit the OnSEA. Website <http://onsea.net>

Achievements

1. The Snapshot index indicate the portable projects work that has been evaluated, and their is not security better than that of in my head or by typewriter.
2. This project is considered a naval project. The onSEA reference is dated back to 2012, where the greeting on C on C, was made.
3. Financials

Annual Report MarleyLABS

On February 14th, 2018 MarleyLABS.net established quantum bell Inc. and became and operating unit of the company as a research group established by this scientist, and has born the other OU units depicted here, while creating a mechanism to protect innovation and developments, as well as maintain an online presence across industry or other segments we are innovating and establishing processes for, where indicated as needed, or not. The intelligence segment that MarleyLABS serves is not typical of the United States, and our portfolio of requirement for defense or innovation is discovered across our methods of using consumer observation to establish the need.

MarleyLABS. holds 1 piece of stock, as a set.

Achievements (Most important noted)

1. The RULE cell prototype was our accomplishment this year. The rule produce about 40 watts, is 2x2 wafer.
2. Levitating a tray and a rock with an ION field.
3. Multiple achievements of research across minerals other developments.
4. Development of the RULE. <http://www.theoryofrelativity.net>

5. The Snapshot index indicate the portable projects work that has been evaluated, and their is not security better than that of in my head or by typewriter.

6. The Snapshot index indicate the portable projects work that has been evaluated, and their is not security better than that of in my head or by typewriter.

7. Visu, Holography, and on demand science.

MarleyLABS is a GOAL contractor. This is Government of an Arch Laboratory, and our projects often begin with very little information, and result with consistent study. MarleyLABS supports more than distributed work load requirements, we also support the workload index as recovered for GoA or other world government needs. We have operated in the fields of Weapons research, flight research, defense industry research, and across multiple personal initiatives.

Goal

GOAL is a Government Of an Arch Laboratory. GOALS are often established for limited or long periods of time, having some scope of operations. Goals projects this year with public / private requests included :

Request for Information (RFI GOAL) (06222018)

- GOAL has a request for innovation; We are seeking methods to process engineer and automate the recycling of garbage, inputting from garbage trucks, to be separated into mineral types and automatically sorted. The design proposal should include methods to handle liquid, chemical, and other wastes by sorting into appropriate container for further processing at the landfill. The proposal input should establish a method to sort biological wastes, chemical, heavy metals, and more, and later enable transport of those containers for processing further those sorted materials for additives and impurities.
- GOAL is seeking methods to remove heavy metals from landfills like mercury from waste mercury switch thermostats, estimated t be tens of thousands of barrel to date, that does not include incineration like Indonesia facilities. The design proposal should identify a method, where after drilling a pipe line under the dump or landfill, to extract, collect, automate processing of liquid wastes while separating heavy metals and other contaminants, including radioactive materials from waste medical equipment, to reduce the liquid content, and transported for additional processing.
- GOAL is seeking opinion regarding methods discovered to clean radioactive water, and a laboratory with design and manufacture capability with access to test or confirm those results for water purification systems. Currently, we have three design processes which can be implemented in a small laboratory for the purpose, and perhaps scaled up.

- GOAL is researching a method to clean water for small towns, without expensive filtration hardware. We have a design approach and method capable of supply from 15 acres of land, producing approximately/est 1000+/- gallons of water per minute using unaltered salt water. If you have the land, and research capability, please contact our laboratory for more information.
- Ecologists: GOAL is seeking ecologist interested in terra forming research. We are looking for capable persons, and proposals, for planting low water consuming plants and vegetation in dessert areas, to grow and research terraforming a dessert landscape into a Forrest; to identify the insect or other populations emerging the result, and more. Please email our company for more details. These projects could later support additional efforts with scientific foundations and data for application on other planets.
- Ecologist: GOAL is seeking interested person in terra forming projects, for the engineering phase of a proposal to construct a salt water pipeline to refill Utah's great salt lake basin, or some selection of other arid landscapes around the globe or in Africa or Iran. The engineer and scientist should be concerned with the engineering of the pipeline, environmental and societal impacts prior to, during, and after the fill, and precisions for weather patterns, wildlife restock, and other identified issues of terraforming effort. These projects could later support additional projects with scientific foundations and data for application on other planets or on other regions of planet earth.
- Cutting Edge (CE QBI) (06222018)
- QBI is seeking scientists willing to participate with early process engineering, trial, and test initiatives with our private laboratory. We have discovered a way to float a material without the addition of power, and without reliance on earth energy systems, and are seeking ways to apply the innovation to vehicles, boats, and aircraft; and also to increase a stable lift potential. If you would like to duplicate and confirm our research, please send your request in writing to the laboratory.
- QBI has discovered a weapons system ballistic for projectiles, and is seeking persons capable of testing and applying to products the discovery. We are looking for cooperating scientists capable of testing on land, sea, and eventually orbit, those ballistics systems and establishing criteria relative to conventional ballistic propellants.
- QBI is planning to acquire land, and additional space for research, to build the worlds first uLINE data reception facility. We will indicate technical reception and post design request or proposals as approved.

Projects Developmental (PD QBI) (06222018)

These projects represent data sets I am seeking, and will produce myself if nobody determine they want to volunteer, or other. These are often researched and presented on this site when they are ready for presentation or just don't have enough time to do that work for reason complicated among so much self produced data that I work with.

(ToR) Theory of Relativity Improvements

Theoryofrelativity.net

1. Quantunnel Version is in use, and has not been improve beyond version .019 draft.
2. The ToR modeling was presented online, and is a instructions based opportunity for limited presentation with roots in the text book draft v.019 of the Quantunnel work I am developing.
3. The Theory of time light relativity is presented at timelightreltivity.theoryofreltivity.net. The relative concept was shown with the ruler to provide proximate none identical data at proximate or relative time according to transfer applications. The issues were removed from the internet for probability of worm hole displacing planet location or other wise consuming the planet, a black hole referring to the worm hole.
4. The Model was presented as a few equations, and on this day, no question from the eternal public, across what is hit count exceeding over a million views, mostly from CERN, NIF, MIT, and other research establishments where there IP access noted. When this was placed online, the company and I are still the only persons speaking of the ToR concept across accessible information at theoryofrelativity.net
5. The ToR model originated from Florida born family, and is being developed by that same person inside the united States of America. This also presented as perspective model, and where someday, their will be argument over exactness, or other problems of the model integration.
6. On this day in history for the ToR model, it as strong as the observation of the universe is strong; and is so across dimensions described, addition to 6 dimension time (resolved as distance dimensions, probable time correlation a reference only to local or larger clocks, like stars and galaxies, or planets moons, and more. (My cuckoo clock is fancier thans the Germans Einstein model.)
7. The ToR model has been updated to included time data dimensions, exceeding several thousand in my hand, and accessible across most stars in the visible sky. The door modeling is proprietary, it can be understood by asking a questions; and is used for camouflouge.

8. Gravity is now proven by the ToR uLINE concepts achieving the same space time shape as modern scientist use to calculate trajectories of rockets or satellites and other airborne items. The ToR modeling produces the similar shape of gravity estimated by Einstein physics, and when applied across arrows of man made rockets; both models produce similar results for satellite behavior, rockets, and more.
9. Retention for gravity of the atmosphere while stated, is still not well understood relative to some moons of Jupiter or Saturn. The behavior of mass, and energy relative to surface as part of the model, and with the added perspective of the shadow or light region, demonstrates it is held in place the result of composition of mass and uLINE rule, or ability to modify interaction with the model as determined by some technology or life. Not modifying the model, rather taking advantage of flight, energy, or other needs. (How the tray was floated, it refuses model permeability, and the materials find rest at higher altitude like helium.) The model shows why planets or some asteroids retain the atmosphere, but in proximity to large planets, some moons do not have an atmosphere as visible to astronomy telescopes. <-- the research for anti gravity is necessary to resolve problem of wheels on cars, a rotor that with so many cars on earth, could slow down earth rotation (like bike tire turning in hands). The replacement discovered is for the wheel, and proven as part of PMTM flight modeling for the helicopter I am designing and other craft as indicated on the keys of anarchy, I have early been working on.

This year at Quantum Bell Inc.

This year at Quantum Bell inc, we will be resolving security issue for our company, where it is needed and litigating a few cases as required for most companies to maintain or otherwise continue to do development.

The company will be moving into the first quarter with various projects, and closing out some projects as needed, or placing them on hold by resolving a limited mapping concept for the local concepts to be applied. The company will seek help from other persons, willing to secure this area or work with the company.

Quantum Bell Inc is still not planning to use scientific journals, until one of the other laboratories contacts this lab, across CERN, NIF, or foreign nations, resolving some interest in the model as associated with IP Records on websites indicating access by those domestic or foreign persons. This is important for any potential of the Nobel prize investigations requiring notes or innovation of research of this nation or men beginning to compete for the Florida ToR modeling, in development since the 1990s when perspective models were evaluated for the government of anarchy, in high school, and with notes.

Finances

This year Quantum Bell Inc spent about \$3,000 dollars on investigations and related research work. This number does not include labor losses of \$14,016,000 since research began, charged as hourly labor over 8 years by this scientist to the company, since MarleyLABS began planning to operate. These figures are applied across some consistent observation, and stated hourly wage, and absent assessment of damages, hiests, or more.

Our annual income tax will be recorded with the IRS, with no income earned from customers or by charity organizations. This scientist has footed the bill for all of the research since unsatisfactory employment with another company resolved building a company that would not target, steal from, or kill its employees or contract with companies, doctors, and hospitals, that would target, track, steal from, or kill its own employees and contractors. I have resolved not to locate our offices inside a district of a nation that participates with this activity as shown by field work accessible to our employees; and will adhere as soon as financial possible such restrictions.

About the Early work of the Quantum Bell Inc. Founder

Research began when I was a child, first achieving Visu and then across a series of inventions for motor concepts. The first motor puzzle this scientist developed was a DC Twin Flight Concept; it resolved across two DC motors that turning one turned the other, and how to keep it moving.

A series of documents details the specific of research, not necessary for the Annual Reporting requirements of the state. What is indicted here are an overview of some details.

Legal

No agent, contractor, or persons employed by or on behalf of the united states government is authorized to harass, kill, stalk, impact, murder, or commit crime of civil liberties, property, corruption to any person of the united states or another nation for filing a complaint that saves lives, informs of wrong doing, or is working to preserve such prosperity agreements as life, liberty, or the pursuit of happiness. Any represented, agent, or employee of the united states or states and federal government enterprises, who takes it upon themselves to commit such crimes, infringing liberty, state or national security, and while alleging it is on behalf of some attempt to do harm the result of complaint or alleged criminal activity, is not working for, representing, or acting in accordance with American or state law. Those men are subject to criminal penalty, civil liability, and risk not only their job, but their freedom while performing an such action, including alleging that silencing a victim of government abuse or other parties working with or for the us government is helping the united states government. Our pursuit is to maintain a just and safe workplace, and those men working for such agenda public are not, are an enemy of the united government and his work to ensure safe and just work environment for all our employees and contractors. This agreement applies across Quantum Bell Inc. Employees or Volunteers. (needs to be better written.)

Intentionally left blank.

To obtain a copy of the full annual report, or any part thereof, write or call 320 Endora St, Ormond Beach, FL, 32174. You can call me at 386-451-7555 if your phone call is permitted on the switch gear. You can request a copy of developments at the laboratory if you would like.

Quantum Bell Inc.

Registration for Document ID and

Annual Document Address Match.

This report is assembled by Michael Joseph Marley in January of 2019 and is expected to be released between February 1, and May 1 of the same year. You can contact the company or ask for more details by sending an email to timelightrelativity@gmail.com or you can use contact@quantumbell.net You can also contact the offices by telephone. You can mail correspondence to 320 Endora Street, Daytona Beach, FL or Visit us the Business Location coming soon as small warehouse on Bellevue Ave in Daytona Beach Florida. We will have Runway access to the Daytona International Airport, in Daytona Beach, FL. This document was assembled using spell check of open office products and services, and Microsoft standard word pad application. The information developed by our company is unusually tracked and this is a problem I am unable to resolve, perhaps by some design. These annual reports can be edited by the uthor and re published with corrections without notifying the general public before posted again to quantumbell.net, the only source for this document to originate in some public way.
